

 MicroPort®	MicroPort CRM Security Bulletin	Version 1.0
--	---------------------------------	-------------

## Product security bulletin: Apache Log4j

Publication date: 01/18/2021

Last update: 01/18/2021

MicroPort®CRM is aware of recent discovered vulnerabilities in the Apache's Log4j software library also called "Log4shell". Log4j is a Java-based logging library used in a variety of websites, applications, consumer and enterprise services, and OT products. The vulnerability allows unauthenticated remote code execution on the vulnerable system.

### **Microport® CRM products are not impacted by this vulnerability:**

MicroPort® CRM has performed a deep analysis of its products and concludes that the Log4j vulnerabilities do not affect any Microport CRM products.

### **Additional information**

MicroPort® CRM remains attentive to the latest vulnerabilities to ensure the highest possible security for its devices.

Confidentiality and security are MicroPort® CRM's core values and we therefore undertake to ensure the privacy and security of all the users.
